## Real solution for your work

Ideal for the office and everyone who makes a lot of calls, the Snom 320 is an affordable, yet powerful telephone for your office. A 2x24 graphical LCD display and a menu-driven user interface supports easy feature management.

12 programmable keys with LEDs support flexible access/key configuration. A 100 number call memory, a 100 entry onboard address book (to which data may easily be uploaded), custom call blocking, configurable/downloadable ringtones, auto-answer mode, DND and other sophisticated features ensure convenience and productivity. And the Snom 320's built-in web server supports even simpler end user configuration, screen dialing, and access to call history.

The Snom 320 is remote-manageable and updatable, uniquely easy to install and largely self-configuring. Broad codec support and its other state-of-the-art features enables flexible deployment with various, IP PBXs or hosted VoIP platforms.

## Security on the first place

The Snom 320 supports the security standard SRTP and TLS for protection against sniffing of signaling and authentication data.

With its characteristic horizontal design for easy dialing, the Snom 320 features a broad array of timesaving and efficient dedicated function keys.
